Choose an item

Students studying an Engineering degree at UNSW must only conduct unpaid industrial training that provides a learning experience, and NOT work that simply assists with the ordinary operation of the business or organisation. The below learning outcomes can be used as a guide in developing your learning objectives.

- Demonstrate the application of established engineering methods to industrial problem solving.
- Demonstrate ethical conduct and professional accountability.
- Communicate in a professional context, in both oral and written forms.
- Demonstrate a creative, innovative and pro-active demeanour.
- Use and manage information in a professional manner.
- Demonstrate self-management skills and professional conduct.
- Demonstrate effective team membership and leadership.
